## **Infosys completes 8 years of NYSE listing, to ring closing bell**

Infosys will ring the closing bell at the New York Stock Exchange (NYSE) on December 11 to commemorate its eighth anniversary of listing on the exchange. Infosys CEO Salil Parekh will ring the closing bell in a ceremony to celebrate the company's 2020 achievements, including its eight years of trading on the NYSE, rapid growth in the US, and its recently announced Environmental, Social and Governance (ESG) Vision for 2030, a regulatory filing said.

"This has been a pivotal year for our employees, customers, and investors, as we have together faced historic challenges. As the world emerges out of the ongoing disruption, Infosys has remained steadfastly committed to helping global enterprises navigate the challenges through rapid digital acceleration. "This year also marks Infosys' expanded investment in our US presence, commitment to create 25,000 American jobs by 2022, and efforts to meet the reskilling and employment needs raised by COVID-19," Parekh said.

Infosys plans to hire 12,000 American workers over the next two years, taking its hiring commitment in the country to 25,000 over five years. In 2017, Infosys had committed to hiring 10,000 American workers over two years, and has created 13,000 jobs in the US.

"The moment also celebrates the company's ESG roadmap for 2030, through which it continues to set high aspirations towards being a well-governed organisation for diverse talent with an inclusive workplace and community strategies to

leverage technology for good," Parekh said. This year, Infosys achieved carbon neutrality, 30 years ahead of 2050, the timeline set by the Paris Agreement.

## **Best Trades of the Week**

December 07, 2020: Profit of Rs. 112,256

December 08, 2020: Profit of Rs. 53,020

December 09, 2020: Profit of Rs. 41,485

December 10, 2020: Profit of Rs. 47,583

December 11, 2020: Profit of Rs. 57,294

The Nifty is currently trading at a one-year forward price-to-earnings multiple of ~27 times compared with its 10-year average of 17.3 times. In this week, one of our traders made a profit of Rs. 112,256 on December 07, 2020 highest of all other days in a week.

Making a consistent profit should be the ideal approach rather than looking at the percentage of profits. Yogeshwar sir always teach one important rule of stock market which is

"Always work on reducing your risk and never allow yourself to take a big loss."

If you want to stay in the stock market game, then you should work on making a consistent profit and reducing our risk. Risk management is the key to success here. I believe, people who don't follow proper risk management, always find themselves in the struggle. No doubt, you would have made a big profit some days. But the real challenge is to maintain that kind of profits everyday day. If you are making

Rs. One lack in a day and losing the same on other days. You are not working as a professional trader. I can assume this sort of profit-making is through gambling.

What we have learned at Pathfinders Trainings, you can see the results of that learning by looking at the profits made by professional traders. Every trade is good, even you make less profit. But working on not making big losses in the market should be our priority. If we have the capital to play in the market, our small loss can be turned into small profit and with consistency, into big profit.
