Easy Trip Planners gains 11.4% on first day of trading, ends at Rs 208.30

Easy Trip Planners share closed the listing day with more than 11 percent gains on March 19 but failed to meet the street expectations. The weakness in equity markets in the run-up to the market debut and rising COVID-19 cases in the country could have come in the way of analysts' expectations of a big opening.

The stock opened at Rs 206 on the BSE, a 10.2 percent premium over the issue price of Rs 187. Analysts largely expected it to list with a 50-80 percent premium, given the huge demand in the grey market, 159.33 times subscription and sound fundamentals of the company. In fact, the early volatility pushed the stock down to its issue price, though it immediately recovered to trade higher for the rest of the day.

Finally, it settled the day gaining 11.39 percent at Rs 208.30, with a volume of 44.08 lakh equity shares on the BSE.

On the National Stock Exchange, the stock rose 11.47 percent to close at Rs 208.45, with a volume of over 4.26 crore equity shares after seeing an intraday high of Rs 234 and Rs 187.20.

The online travel platform Easy Trip Planners raised Rs 510 crore through its public issue. The money was received by promoters as it was an offer for sale issue.

Best Trades of the Week

15 March 2021	Profit of Rs. 135,717
16 March 2021	Profit of Rs. 28,035
17 March 2021	Profit of Rs. 94,094
18 March 2021	Profit of Rs. 60,523
19 March 2021	Profit of Rs. 100,453

Indices were all red last week as weak global cues, rising bond yields, and fears of COVID-19-led lockdown came to haunt the bulls on Dalal Street. The Nifty formed an opening body bearish Marubozu candlestick pattern and it filled the bullish gap standing around the 14,350-mark on March 19. In this highly volatile week as well, one of our traders made a profit of Rs. 135,717 on 15 March 2021, the highest of all other days in a week.

Making a consistent profit should be the ideal approach rather than looking at the percentage of profits. Yogeshwar sir always teach one important rule of the stock market which is "Always work on reducing your risk and never allow yourself to take a big loss."

If you want to stay in the stock market game, then you should work on making a consistent profit and reducing your risk. Risk management is the key to success here. I believe, people who don't follow proper risk management, always find themselves in the struggle. No doubt, you would have made a big profit some days. But the real challenge is to maintain that kind of profits everyday day. If you are making Rs. One lack in a day and losing the same on other days. You are not working as a professional trader. I can assume this sort of

profit-making is through gambling.

What we have learned at Pathfinders Trainings, you can see the results of that learning by looking at the profits made by professional traders. Every trade is good, even you make less profit. But working on not making big losses in the market should be our priority. If we have the capital to play in the market, our small loss can be turned into a small profit and with consistency, into a big profit.

Aarti Drugs share price jumps 15% as board approves buyback worth up to Rs 60 crore
