### ***Divi's Labs shares up 7 percent after Merck pill raises hope for COVID patients***

Divi's Labs share price was up over 7 percent in the afternoon session on October 4, after experimental antiviral pill Molnupiravir was found to reduce the risk of hospitalisation or death of approximately 50 percent of those most at risk of contracting COVID-19.

Divi's Labs is Merck's authorised manufacturer of Molnupiravir. Divi's Laboratories, which makes the main ingredient of Merck & Co's experimental antiviral pill, reported positive clinical trial results for the drug.

US-based Merck and Ridgeback Biotherapeutics announced that its investigational oral antiviral medicine, Molnupiravir, has significantly reduced the risk of hospitalisation or death of non-hospitalised adult patients with mild-to-moderate COVID-19.

"At the recommendation of an independent Data Monitoring Committee, and in consultation with the US FDA, the recruitment into the study is being stopped early due to these positive results. Merck plans to submit an application for Emergency Use Authorisation (EUA) to the US FDA soon and marketing applications to other regulatory bodies worldwide," the US-based company said in a statement.

### ***Best Trades of the Week***

27 Sep 2021 Profit of Rs. 178,422  
28 Sep 2021 Profit of Rs. 144,900  
29 Sep 2021 Profit of Rs. 149,065  
30 Sep 2021 Profit of Rs. 89,636  
01 Oct 2021 Profit of Rs. 58,166

The market snapped five-week winning streak in the week ended October 1 as bears have taken charge over Dalal Street amid lack of drivers in the domestic cues. Global cues including rising oil prices & US bond yields, and increasing concerns over the Chinese economy dampened the sentiment, but accelerated core sector data to 11.6 percent and rising Manufacturing PMI in September to 53.7 limited the weekly losses. In this week as well, one of our traders made a profit of Rs. 178,422 on 27 Sep 2021, the highest of all other days in a week.

Making a consistent profit should be the ideal approach rather than looking at the percentage of profits. Yogeshwar sir always teach one important rule of the stock market which is "Always work on reducing your risk and never allow yourself to take a big loss."

If you want to stay in the stock market game, then you should work on making a consistent profit and reducing your risk. Risk management is the key to success here. I believe, people who don't follow proper risk management, always find themselves in the struggle.

No doubt, you would have made a big profit some days. But the real challenge is to maintain that kind of profits everyday day. If you are making Rs. One lack in a day and losing the same on other days. You are not working as a professional trader. I can assume this sort of profit-making is through gambling.

What we have learned at Pathfinders Trainings, you can see the results of that learning by looking at the profits made by professional traders. Every trade is good, even you make less profit. But working on not making big losses in the market should be our priority. If we have the capital to play in the market, our

small loss can be turned into a small profit and with consistency, into a big profit.

### ***NTPC share price touches 52-week high on plan to list subsidiaries by March 2024***

NTPC share price touched a 52-week high of Rs 145.75, rising 4 percent intraday on October 4 on reports of the government-owned electricity generator's plan to subsidiaries by March 2024.

The company is planning to list NTPC REL, NEEPCO & NVVN by March 2024, CNBC-TV18 reported sources as saying.

NTPC REL (NTPC Renewable Energy Ltd) is a 100 percent subsidiary of NTPC with 3.5 GW renewable projects. NTPC aims to build 60 GW renewable capacity by 2032 with an expected investment of Rs 2.5 lakh crore.

Focused on the Noretheast, North Eastern Electric Power Corporaton Limited is a 100 percent subsidiary of NTPC with over 2,000 MW capacity.
