Latent View Analytics IPO: Will it be a bumper listing on November 23?

Global data and analytics company Latent View Analytics makes its market debut on November 23, with analysts expecting the share to list at 150 percent premium over the issue price of Rs 197.

Analysts are upbeat on the listing following an overwhelming response as the Rs 600-crore public issue, the company's strong financials, reasonable valuations and bright growth prospects.

"Latent View Analytics is set for a big bumper listing with the IPO subscribed whopping 326 times and trading at a 180 percent premium on the grey market," said Sonam Srivastava, Founder of Wright Research.

"This IPO gives me a flashback to the Happiest Minds IPO not only listed at a 113 percent listing gain but is also up 600 percent even after the listing in 11 months."

A weak equity market, however, is a concern as the benchmark indices have fallen more than 6.5 percent from its record highs of October.

Bears went on a rampage on November 22 as well. The Sensex tanked 1,170 points to 58,466 and Nifty tumbled 348 points to close at 17,416.

A good listing may help lift the mood that has been soured by Paytm's forgettable debut on November 18.

Best Trades of the Week

15 Nov 2021 Profit of Rs. 25,629

16 Nov 2021 Profit of Rs. 195,522

17 Nov 2021 Profit of Rs. 128,607

18 Nov 2021 Profit of Rs. 65,422

19 Nov 2021 Holiday

The market nosedived further with the BSE Sensex falling way below the 60,000 mark, dragged by selling in all sectors with Auto, IT, Metal and Pharma being the prominent losers on November 18.

The BSE Sensex plunged 433.05 points to close at 59,575.28, while the Nifty50 fell 133.90 points to 17,764.80 and formed a bearish candle on the daily charts, continuing the downtrend for the third consecutive session. The index also saw bearish candle formation on the weekly charts as it was down 1.87 percent during the week. In this week as well, one of our traders made a profit of Rs. 195,522 on 16 Nov 2021, the highest of all other days in a week.

Making a consistent profit should be the ideal approach rather than looking at the percentage of profits. Yogeshwar sir always teaches one important rule of the stock market which is "Always work on reducing your risk and never allow yourself to take a big loss."

If you want to stay in the stock market game, then you should work on making a consistent profit and reducing your risk. Risk manage-

ment is the key to success here. I believe, people who don't follow proper risk management, always find themselves in the struggle. No doubt, you would have made a big profit some days. But the real challenge is to maintain that kind of profits everyday day. If you are making Rs. One lack in a day and losing the same on other days. You are not working as a professional trader. I can assume this sort of profit-making is through gambling.

What we have learned at Pathfinders Trainings, you can see the results of that learning by looking at the profits made by professional traders. Every trade is good, even you make

less profit. But working on not making big losses in the market should be our priority. If we have the capital to play in the market, our small loss can be turned into a small profit and with consistency, into a big profit.

Bharti Airtel share price touches 52-week high on revision of prepaid mobile tariffs

Bharti Airtel share price touched a 52-week high of Rs 749.15, rising 5 percent in the early trade on November 22, after the company had announced revised mobile tariffs for the prepaid customers.

Bharti Airtel announced revised mobile tariffs for the prepaid plan. The company has hiked prepaid tariffs by 20-25 percent effective November 26, company said in the release.

Bharti Airtel has always maintained that the mobile Average Revenue Per User (ARPU) needs to be at Rs 200 and ultimately at Rs 300, so as to provide a reasonable return on capital that allows for a financially healthy business model, company added. Source:moneycontrol.com
